TECHNIQ	

\*Excludes Valet veneer tray top

All the above-mentioned products can be specified to meet the Healthy Interiors goal version 2.0 of the Safer Chemicals Challenge. Below is information to help specify products that meet the goal. Additional guidance can be requested by contacting Davis Furniture.

Davis Furniture strives to offer a broad selection of furniture options that meet the goal requirements in a wide variety of finishes and textiles, and as such, it is not possible to provide laboratory test results for every possible combination. The customer is responsible for specifying fabrics compliant with the following guidelines.

### Product Selection Guidance:

#### Formaldehyde

All of the Davis Furniture products listed above are currently SCS Indoor Advantage Gold certified to meet the formaldehyde emissions requirement. They have been tested in accordance with ANSI/BIFMA standard method M7.1/X7.1-2011 R2016 and ANSI/BIFMA e3-2014e. Certificates are available on the Davis Furniture website.

#### Per- and Poly- Fluorinated Compounds (PFC's)

PFC-free fabrics are available. Some fabrics may contain PFC's, so customers must specify PFC-free fabrics. Customers are responsible for COM fabric treatments and chemical contents.

#### Polyvinyl Chloride (PVC's)

Not all Davis Furniture products are 100% PVC free. Some non-work surface edges may contain PVC in an amount less than 1% of the total product weight.<sup>1</sup> Non-PVC edge banding is available on most laminate work surfaces. Veneered work surfaces are PVC free. Some fabrics may contain PVC's, so customers must specify PVC-free fabrics. Customers are responsible for COM fabric treatments and chemical contents.

#### Antimicrobials

Davis Furniture does not add any antimicrobial chemicals to any of our products. Antimicrobial-free fabrics are available. Some fabrics may contain antimicrobial chemicals, so customers must specify antimicrobial-free fabrics. Customers are responsible for the COM fabric treatments and chemical contents.

#### Flame Retardants

All standard Davis Furniture products are available with flame retardant free materials unless specifically ordered to meet TB133. Some fabrics may contain flame retardants, so customers must specify flame retardant free fabrics. Customers are responsible for the COM fabric treatments and chemical contents. Any product receiving an electrical device may contain added Flame Retardants.

<sup>1</sup> Healthier Hospital Guideline V2.0 states "Products made up of less than 1% (one percent) of PVC by weight are exempt."

---

The furniture described herein meets the Healthy Interiors goal of Safer Chemicals Challenge according to the manufacturer. Practice Greenhealth does not verify this information.

*Davis Furniture reserves the right to change materials without notice but will continue to pursue product offerings which meet the criteria outlined in the Safer Chemicals Challenge.*
